3. [radeon drivers linux](#)

I know that to set up Leopard on my 800Mhz iBook i have got to circumvent the 867MHz necessity from Leopard, its fine i actually can use LeopardAssist for that, but will the Primary Image be hardware expanded as nicely under Leopard as it was on my some other model? I'meters requesting this because i still have beneficial information on my iBook and hell it takes period to set up Leopard on this iBook, (shoe the dvd movie and do the install, sometimes fails also).. Today on the iBook i very own, the same thing under Gambling, Core Image is not supported.. Well right here it will go, my iBook G4, from which i have always been typing this, is usually the earlier of all G4 versions, its has a maximum capability of 640mn ram memory, a 30 gigabyte hd, and an ATI Flexibility Radeon 9200 (1st Model in the listing in ) I formerly possessed another iBook G4, its the 7tl in As you can discover both possess the exact same ATI Flexibility Radeon 9200, except if it is x4 agp i don't know that.. Therefore if anyone need to clear things up he/she is definitely most pleasant You certainly the afterwards model you acquired wasn't á Radeon 9550?.
